1 ZStack Cloud 5.1.30

On August 16, 2024, ZStack Cloud officially released its new version, **ZStack Cloud 5.1.30**, covering a number of important features described in details below.

Overview

Internationalization

1. ZStack Cloud UI supports 8 new languages.

1.1 Internationalization

1.1.1 ZStack Cloud UI Supports 8 New Languages

In previous versions, ZStack Cloud supports two UI languages: Simplified Chinese and English. You can switch the UI language flexibly according to your preference.

Starting from version 5.1.30, to better cater to the linguistic preferences of international users, ZStack Cloud provides more UI language options, including Traditional Chinese, Russian, Indonesian, Japanese, Korean, Thai, French, and German, aiming to provide more international users with a smooth and convenient user experience.

You can switch the UI language on the **Login** page by clicking the button in the top right corner. If you have already logged in, you can switch the UI language by clicking the avatar in the top right corner. Currently, the following languages are supported: Simplified Chinese, Traditional Chinese, English, Russian, Indonesian, Japanese, Korean, Thai, French, and German.
